General Description:

Pdrive rotational speed-360 rpm; average latency (1/2 rotation)-83 msec; track-to-track access time-11 msec; head settle time at last track-11 msec; data transfer rate-500 kilobits per second; mounted by four knurled fasteners (miltope source control no. M143-137) on 5.060 in. By 5.840 in. Mountings centers; voltage input: 110-130vac, 47-63hz, 3 amp max; store, write and read digital information under host computer control; control up to three slave disk drive assemblies

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
