Special Features:

10 hz to 100 khz; line-rejection filter; c/o: high-impedance low-noise preamplifier and a tuned amplifier and compression amplifier and two phase-sensitive detectors; 3 panel meters; max input 200 v rms; 12 position switch for voltage gain; 0 to 360 degrees continuous rotation reference signals; 50 hz bench model option; phase shifter; 0 to p 55 degrees c operating temperature; 497x169x329 mm

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
