Special Test Features:

Provide facilities for combining output signals for an 8 beam rosette array to produce an omnidirectional azimuth reception pattern; designed for transportable hf radio installations

General Description:

2-30mhz freq range; 50 ohm impedance; o/all dim 19 in. By 3 in. By 3.5 in; rack mtd

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
