Overall Length:

20.620 inches

Overall Height:

13.620 inches

Overall Width:

20.500 inches

End Application:

An/urc-108 radio set, airborne

Component Controlling Agency:

Jedts

Component Name:

Case assembly

Component Identifying Number:

Cy-8047/urc-108 type no.

Special Features:

Provides a compact, weather proof housing for transporting, storing, and operating items of equipment comprising the satcom terminal (excluding the antenna preamplifier); controls and indicators mounted on the case assembly control application of dc power to the system, permit mode, antenna and modulation selection, permit monitoring of transmit/receive functions in the 2 operating modes, and allow relative rf power measurements

Material:

Aluminum

Material:

Aluminum

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T358-a
