| Overall Length:                        |
|--|
| 0.800 inches                           |
| Overall Height:                        |
| 0.400 inches                           |
| Overall Width:                         |
| 0.400 inches                           |
| Operating Tempurature Range:           |
| -55.0/+100.0 degrees celsius           |
| Average Life Measurement:              |
| Not rated                              |
| Basic Shape Style:                     |
| Rectangular or square                  |
| Identification Designator:             |
| Ray-2-15542                            |
| Inclosure Type:                        |
| Hermetically sealed                    |
| Installation Design:                   |
| Module                                 |
| Circuit Construction Type:             |
| Solid state                            |
| Frequency Per Channel:                 |
| 1000.0 megahertz input channel err-100 |
| Attenuation In Decibels:               |
| 6.0                                    |
| Average Power Rating Per Channel:      |
| 500.0 milliwatts input                 |
| Connection Type And Location:          |
| Wire lead terminals bottom             |
| Connection Contact Type And Quantity:  |
| 8 wire lead terminals external         |
| Shelf Life:                            |
| N/a                                    |
| Unit Of Measure:                       |
|  |
| Demilitarization:                      |
| Yes - demil/mli                        |
| Fiig:                                  |
| A32200                                 |
|  |
