Section Quantity:

4

Overall Length:

19.000 inches

Overall Height:

3.000 inches

Overall Width:

3.500 inches

Panel Material:

Aluminum

Connecting Position Quantity Per Section:

7

Receptacle Quantity:

7

Special Features:

The freq standard patch panel will provide tnc connector terminations for all timing signals generated in the cesium beam std, the inputs and output of isolation amplifiers and the inputs to up and down converters. Tnc patch cords will then allow any configuration to be selected

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T122-d
