Maximum Radio Frequency Rating:

25.0 megahertz

End Application:

An/msr-t4

Usage Design:

Video switch matrix

Operation Method:

Manual

Functional Description:

Switches up to 6 of 12 separate video inputs to any one of 6 separate and isolated outputs

Supplementary Features:

Automatic operation mode also; standard 19-inch slide mount

Type/model Designation:

Fe-7732a

Fsc Application Data:

Multi receiver analyzer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:
