Overall Length:

10.620 inches

Overall Height:

4.400 inches

Overall Width:

15.750 inches

Key Quantity:

82

End Application:

Processor-modem group om-6 (v)1/fsc-83(v)

Unit Design:

Cabinet

Special Features:

Operating power requirements: voltake p5 vdc and m12 vdc; current .3 ampprimary input unit for sacdin, providesthe operator with the capability to select transmission method, generate alpha-numeric characters and special control characters for message header composition control of ced software functions such as print, and output and control of vdu displayed data to/from magnetic diskettes; operator acknowledgement and eam acknowledge keys in conjunction with applicable status indicators are also provided. Controls for deletion insertion and replacement of characters insertion or deletion of lines and clearing text from screen or buffer

Nuclear Hardness Critical Feature:

Hardened

Unpackaged Unit Weight:

12.000 pounds

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A509m0
