Overall Length:

3.000 inches

Overall Height:

1.000 inches

Overall Width:

2.000 inches

Frequency Rating:

Between 2.7 gigahertz and 2.9 gigahertz

End Application:

An/tpn-19, landing control central

Electrical Power Source Relationship:

Operating

Limiting Type:

Transistor

Limiting Adjustability:

Not adjustable

Criticality Code Justification:

Feat

Special Features:

Contains a radioactive ga (type & quantity unknown)

Supplementary Features:

Made of aluminum matl, discrete component parts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T198-a
