Overall Length:

7.800 inches

Overall Height:

0.450 inches

Overall Width:

6.800 inches

End Application:

Digital multiplexer-demultiplexerdmx-a3/c3

Multiplexing Method:

Time division

Channel Type And Quantity:

3 transmitting

Supplementary Features:

Ds-e multiplexer forms the common gated ds-e transmit data stream from 3 ds-1 data streams and overhead bits (coded items, loopback requests and framing bits); provides 3 gated ds-1 transmit clock signals that are synchronized to the master clock; contains an externally activated visual alarm; power rqmt -5.2 vdc; solid state; etched-circuit module fits an 8.75 in card cage; power and signal connections are via a 72-pin edge-on connector

Fsc Application Data:

Ds-e mx

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T187-f
