Overall Length:

7.810 inches

Overall Height:

0.610 inches

Overall Width:

6.940 inches

End Application:

Digital multiplexer-demultiplexerdmx-a3/c3

Supplementary Features:

Xprocessor interface allows 16 data lines of bi-direction communications between the microprocessor and peripheral equipment; required +5 and -19 v inputs; provides level conversion for data to and from peripheral equipment; allows for strap options for time delay in interrupt lines; provides test points for signal measurement; no connectors or indicators are available; solid state; etched-circuit module plugs into 8.5 in card cage; power and signal provided by 72-pin edge-on connector

Fsc Application Data:

Processor interface

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T187-f
