Overall Length:

12.375 inches

Overall Height:

1.375 inches

Overall Width:

7.500 inches

End Application:

Digital microwave radio; rd-u4 hotstandby; dm-4a processing shelves

Functional Description:

If combiner combines the main and diversi type 70 mhz if signals from the low noise down converter modules; requires a -15v input from power converter; monitors both if levels and provides outputs to monitor and alarm unit for alarm indication and pin jack test points for maintenance; if alarm threshold is preset at -24 dbm and a combiner stress (comb stress) voltage output provides alarm indication if exceeded; applies a controlled phase-shift to one if paths under control of an error voltage from the if module

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
