Average Life Measurement:

Not rated

Basic Shape Style:

Cylindrical

Inclosure Type:

Encapsulated

Installation Design:

Module

Circuit Construction Type:

Solid state

Frequency Per Channel:

12.4 gigahertz operating channel

Average Power Rating Per Channel:

200.0 milliwatts input

Connection Type And Location:

Connector, plug left side and receptacle, power right side

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
