Average Life Measurement:

Not rated

End Application:

F15

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Module

Circuit Construction Type:

Solid state

Signal Data Type Per Channel:

Operating channel analog voltage

Special Features:

Cover assembly, harness access 3; cover assembly, module access 3; circuit card assembly 26; power supply 6; cable assembly 16; chassis assembly, wired 4

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
