End Application:

An/fsc-111

Usage Design:

Intercontinental ballistic missile satellite terminal

Special Features:

Pedestal mounted or rack mounted; 32.650 in. W; 39.000 in. H; 36.000 in.D; 450 lbs

Functional Description:

Used for sats near term command and control connectivity requirements to the minuteman/peacemaker launch control centers

Supplementary Features:

Performs super high frequency down conversion; signal dechopping; demodulation; message processing; uhf message transmitter; ac power 110v, 60 hz, 1 phase, 5 amps; provision for internal battery

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
