**Overall Length:**

25.000 inches

**Overall Height:**

8.750 inches

**Overall Width:**

19.000 inches

**Average Life Measurement:**

Not rated

**End Application:**

An/trq-4 (v) 1 radio set

**Basic Shape Style:**

Rectangular or square

**Inclosure Type:**

Encased

**Installation Design:**

Module

**Circuit Construction Type:**

Solid state

**Operating Ac Frequency In Hertz:**

47.0 single voltage and 440.0 single voltage

**External Ac Operating Voltage In Volts:**

230.0 1st voltage

**Phase:**

Single

**Supplementary Features:**

Unit is a scanning hf receiver which scans all 14, 000 3 khz wide channels spaced 2 khz apart between 2-30 mhz; it dwells on each channel long enough to assess the received power level and determine the background noise level; each channel is revisited approximately every 20 seconds; the data thus collected is averaged over either 5 or 30 minutes, and is presented to the operator in a series of crt displays; such channel occupancy data is useful to the frequency manager of an hf system by indicating which frequencies are clear of outside interference

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A32200
