Special Features:

Keyboard measures 4.289 w. X 3.539 h., rating at 24 vdc; 10 milliamps, resistive, contact resistance; 3 ohms max., 250 vac btwn mutually insulated parts, 4 row x 5 column keyboard, nema grade fr-4 glass epoxy used for circuit board base, polyester used for graphic overlay and spacer, mtg surface shall be of 3 military polyester, coated on 2 sides with acrylic adhesive, unit shall be mtd with bezel; fsc application data: antenna controller, meterological;

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A509m0
