Overall Height:

3.500 inches

Overall Width:

19.000 inches

End Application:

Fscn/cue an/fs (v)

Special Features:

Designed to synchronize to and may be contaminated by noise, jitter, amplitude or baseline modulation; provides the capability to extract bit clock timing from recorded input signals and generate bit sync lock status; performs pcm data detection from input signals; operating power

reqmnts: ac, 105 to 125 v; 57 to 63 hz

Fsc Application Data:

P/n a18369-01

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A541g0
