laximum Voltage Rating In Volts:
0.0 dc
nd Application:
n/gsq-235. Part of delta electronics model sls-4m strip line switch matrix
nclosure Type:
ninclosed
ower Source:
xternal
upplementary Features:
his assembly consists of a stepping rotary solenoid and a wafer switchdeck assembly. This wafer switch assembly contains the interlock
nd indicator switches and the actuator control circuit. The antenna selector is configured in a matrix and will actuate various rf switches
onnecting various antennas to the specified transmitter. The selector can be operated locally or at a remote location
