Dc Voltage Rating:

28.0 volts

End Application:

5895-01-167-7656

Joint Electronics Type Designation System Item Name:

Demodulator

Joint Electronics Type Designation System Item Type Number:

Om-84/p

Electrical Power Source Relationship:

Self-contained

Installation Design:

Transportable

Vehicle For Which Designed:

Truck

Functional Description:

Used to provide audio routing and connectivity between the receiver subsystem, the recording subsystem, the an/prd-12 and the operator's headsets

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T199-c
