Overall Length:

17.500 inches

Overall Height:

3.500 inches

Overall Width:

15.500 inches

End Application:

Dds (cfe)

Transmitted Signal Frequency Rating:

Between 2989.0 hertz and 3049.0 hertz

Received Signal Frequency Rating:

Between 2989.0 hertz and 3049.0 hertz

Modem Type:

Channel

Supplementary Features:

Operates half- or full-duplex over four-wire leased older type 3002 or newer service types 5, 6, 7, or 8 unconditioned voice-grade private lines, or international ccitt m1040 or equivalent lines; may be used on either point-to-point or multidrop circuits; operates in half-duplex mode over two-wire dial-up lines when two-wire dial interface option is installed; data transfer rate: 4800 bps w/fallback speed or 2400 bps; automatic adaptive equalization

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T187-d
