Average Life Measurement:

Not rated

Basic Shape Style:

Irregular

Inclosure Type:

Encased

Installation Design:

Top of cabinet/counter

Circuit Construction Type:

Solid state

Frequency Per Channel:

1.0 gigahertz operating channel and 18.0 gigahertz operating channel

Operating Ac Frequency In Hertz:

50.0 single voltage and 60.0 single voltage

Functional Description:

Extends the coverage of the r-110, r-110b, r-1250a or other wide range receivers to 18ghz

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A32200
