Channel Type And Quantity:

32 receiving

Special Features:

True 16 bit precision; voltage and input protection; signal-to-noise ratio 98 db; peak and total harmonic distortion -98 db; vxi conforming; dc to dc converter powered by 5 v; self-test capability; compatible with analogic dbs series of data aquisition system modules

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T187-f
