**Overall Length:**

6.620 inches

**Overall Height:**

2.520 inches

**Overall Width:**

6.330 inches

**End Application:**

5820-01-362-0605

**Voltage In Volts And Current Type:**

120.000 ac

**General Description:**

Mthe datalink pre-processor is a communications datalink converter and processor that accepts various synchronous serial communications formats and converts the data into packets of serial asynchronous rs-232 data

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A23900
