End Application:

Dla/gsa managed items that cannot be identified to a specific army weapons systems/end item

Special Features:

The land warrior is a first generation modular, integrated fighting system for dismounted combat soldiers that incorporates an assortment of systems/components/technologies into a lethal, survivable soldier system. Ystems/components include: a modular weapon system with thermal weapon sight (tws), laser rangefinder, digital compass, video camer, and close combat optics; an integrated headgear with helmet mounted display, tws sight picture and image intensifier; enhancements to protective clothing and individual equipment; and an integrated individual soldier computer/radio. Lw s&t advanced components include integrated sight, combat id, enhanced radio and voice recognition. The systems approach will optimize and integrate these capabilities, without adding to the soldiers combat load.
