**Overall Length:**

15.000 inches

**Overall Height:**

1.750 inches

**Overall Width:**

19.000 inches

**Voltage In Volts And Current Type:**

264.0 ac

**General Description:**

V14 signal processing stages incl/13 digital filters; 2 channel spectrum analyzer; 20 band graphic and spectral equalizers; 6 selectable bandwidth; rugged; portable; for laboratory use; hook to windows based pc and 2 tape recorders; pentium recommended; desk or laptop; mouse driven; controls to 19 pieces of virtual equipt; mcap master control panel; w/universal ac input; 12 vdc built in power supply; microprocessor controlled; 4 rear panel bnc connector; audio filtering workstation

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A23900
