End Application:

F04606-95-d-0068

Special Features:

The communication distribution system (cde) provides a distributed digital communication network, in various configurations to field marine air command and control systems (maccs). It provides maccs with the capability to connect multiple shelters to enable a modular increase in capabilities. Maccs shelters are selectively populated with user furnished radio and cryptographic components to accomplish assigned mission."

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
