Overall Length:

3.900 inches

Overall Height:

0.500 inches

Overall Width:

1.750 inches

Operating Temperature Range:

+32.0/+122.0 degrees fahrenheit

Average Life Rating:

100000.0

Average Life Measurement:

Hours

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Module

Circuit Construction Type:

Solid state

Signal Data Type Per Channel:

Operating channel synchro

Special Features:

Converter, asynchronous to synchronous; rs-232 interface; full or half duplex; installation guide included; metal enclosure; silicon chip-line powered; no power supply needed; switch selectable 8 to 11 byte

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
