End Application:

142076- (24930), transmitter group (ssm)

Basic Shape Style:

Rectangular or square

Inclosure Type:

Partially enclosed

Connection Type And Location:

Connector, plug rear

Special Features:

Electrostatic discharge control required for parts handling methods, materials, and equipment used for this circuit card assembly; navy: discharge switch; drawing name: discharge switch module assembly

Reference Data And Literature:

Drawing & parts listing located in jedmics

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
