End Application:

Collective training missile

Maximumlength:

6.550 inches

Maximumwidth:

4.050 inches

Maximumheight:

2.725 inches

Product Name:

Icu assembly

Special Features:

Vindicator control unit allows the aircraft weapons processor to communicate weapon engagement, real-time casualty assesment data that is used for visual indication of weapon events and aircraft rtca status aircraft kill indicator

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A31700
