Product Name:

Datalogger

Special Features:

Szeno-3200 built specifically for environmental monitoring capable of monitoring many sensors, communicating with smart serial sensors, making decisions, performing actions and reporting via some type of telemetry; primary component of the system is a motorola 68332, 32 bit microcontroller; sys runs on ac (110 or 220), solar panel, or battery; current drain from 100ma to 3ma at 12 vdc; eeprom storage; p/n s1034t providestransient surge protection; p/n s1214z also required for sys operation

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
