Overall Length:

8.000 inches

Overall Height:

2.000 inches

Overall Width:

5.000 inches

Electrical Power Source Relationship:

Operating

Internal Battery Accommodation:

Included

Channel Quantity:

2

Total Channel Quantity:

2

Information Recorded:

Process collector demands environments as an electronic log sheet

Special Features:

Data collector with windows ce based, 2-channel data collector and signal analyzer with built-in optical tachometer, dsp, collects both route and off-route data, with 1/8 vga screen

Type/model Designation:

900a

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T198-a
