Overall Length:

14.250 inches

Overall Height:

2.500 inches

Overall Width:

13.500 inches

End Application:

An/sqq-8 (v) 6 unit 272, remote display

Features Provided:

Electrostatic sensitive

Component Type And Quantity:

1 case and 1 network

Product Name:

Inavy x-terminal

Special Features:

Power consumption: base unit shall require 55w (typical) to 70w () power; input voltage and currents characteristics: 110-120va, 1.3a, 60hz; power connector: x-terminal base unit shall have an iec320c-13 molded ground connector on the rear panel, which shall accept a standard grounded power cord; x-terminal shall operate over the temperature range of +5degrees celcius to +40degrees celcius; x-terminal shall operate in relative humidity from 15percent to 85percent rh; x-terminal shall operate in altitude up to 15, 000 ft.; network communications: network type - ethernet, speed - 10 mbits/sec, protocols - tcp/ip, udp, telnet, snmp, connectors: 10base-t, 10base2; weight: the x-terminal base unit has a weight of 10.0lbs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
