End Application:

Rt-179 (p)(c)/usn-61(c) sw version 6.3.1 od..Rt-1799a (p)(c)/usc-61(c) sw version 6.4 ct/pt od.. Rt1799/usc-61(c), p/n 01-p45710f401, rcvr-trans od..Rt1799/usc-61(c) , p/n 01-p45710f404, rcvr-trans

Component Type And Quantity:

1 module

Product Name:

Preselector

Special Features:

The preselector assembly, part number 01-p43085j001, shall be able to receive and transmit signal energy (rf) from 2 mhz to 2 ghz. External rf hardware (i.e., antennas, couplers, lna's, etc) shall conduct rf signal energy to a single receive rf input on the preselector module and the preselector shall also have a single receive rf output that shall interconnect to the rx module. Additionally, the transmit path shall have a single output port which connects to the external rf hardware and a single input port from the tx module. The preselector shall only operate in either a receive or a transmit mode at any given time. The preselector shall process the rf signal energy with suboctave filtering and amplification.
