Dc Voltage Rating:

12.000 volts

Switch:

Included

End Application:

Satellite communication system

Electrical Power Source Relationship:

Operating

Usage Design:

Monitors modems in refundant configuration

Internal Battery Accommodation:

Not included

Unpackaged Unit Weight:

4.600 pounds

Special Features:

1 second maimum fault detection time; 2 x 4 wire; 600 ohm interface; 9 pind type female; 52 to 172 megahertz 1f frequency range

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T122-c
