Special Features:

The ip-octalplus422 industrypack implements eight eia-422 asynchronous serial ports, each with rxc+, rxd-, txd+, txd-, and gnd signals. The serial ports are implemented with two exar st16c654 quad uarts. Each channel has two 64-character fifos to allow longer interrupt servicing latencies.

Shelf Life:

N/a

Unit Of Measure:

Demilitarization:

No
