End Application:

An/asq-234

General Description:

It is composed of an airborne platform (fixed wing aircraft) with controlable sensors working in close coordination with the distributed common ground station army (dcgs-a) that is capable of tasking the sensors, processing the received/intercpeted information and disseminating the results. The multiple sensor subsystems contained in the aircraft include signals intelligence (sigint), imagery intelligence (imint), and measurement and signature intelligence (masint). Other non-sensor subsystems include the communications subsystem and the air survivability equipment subsystem.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
