End Application:

Communications & data systems

Product Name:

Circuit pack

Special Features:

Used in maintenance to monitor power failure signals in an epn cabinet; moniotrs clock, and controls power supplies and battery charger; monitors air flow and high temperature sensors; contains a three-position switch to control emergency power transfer. Contains a dc to dc power converter to monitor processor

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
