Functional Description:

The switching set communications, commonly known as the lan service module, is a component of the data distribution system (dds-r), also known as the tactical data network (tdn); the dds-r will allow a network of communication nodes (gateway and servers) interconnected with one another and their subscribers via a combination of common user long haul transmission systems, local area networks (lans) and the enhanced position location reporting system (eplrs)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:
