**Product Name:**

Configuration module (cm)

**Special Features:**

The computer digital data transfer, commonly known as the configuration module is a component of the data distribution system (dds-r) also known as the tactical data network (tdn). The dds-r that will allow a network of communication nodes (gateway and servers) interconnected with one another and their subscribers via a combination of common user long haul transmission systems, local area networks (lan)'s and the (eplrs) enhanced position location reporting system. The computer digital data transfer will perform digital data encoding/decoding, protocol and data transfer.

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fiig:**

A30800
