Product Name:

Configuration module (cm)

Special Features:

The computer digital data transfer, commonly known as the configuration module is a component of the data distribution system (dds-r) also known as the tactical data network (tdn). The dds-r that will allow a network of communication nodes (gateway and servers) interconnected with one another and their subscribers via a combination of common user long haul transmission systems, local area networks (lan)'s and the (eplrs) enhanced position location reporting system. The computer digital data transfer will perform digital data encoding/decoding, protocol and data transfer.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A30800
