End Application:

F1sp116a (68167) , switch kvm omniview smb cat5.

Special Features:

For use with omniview smb cat5 kvm switches, the omniview smb server interface module is used in conjunction with a cat5 or cat6 cable, significantly reducing clutter behind the rack. It allows users to control any usb server from a distance of up to 100 feet. One module is required with each server connected. A 6-foot cat5 cable is bundled with each server interface module, plus an optional mounting bracket.
