Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Circuit Construction Type:

Any acceptable

Frequency Adjustment Type:

Continuous

Overall Gain:

33.0 decibels

Impedance Rating Per Channel:

50.000 ohms operating channel

Special Features:

Automatic 5/10 mhz and internal/external reference selection; gain control; rf band and I band signal monitorports

Shelf Life:

N/a

Unit Of Measure:

Demilitarization:

No

Fiig:

A32200
