Overall Length:

17.300 inches

Overall Height:

1.700 inches

Overall Width:

6.300 inches

Operating Temperature Range:

+0.0/+40.0 degrees celsius

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Operating Control Method:

Automatic

Installation Design:

Rack

Circuit Construction Type:

Solid state

Frequency Per Channel:

50.0 hertz operating channel and 60.0 hertz operating channel

External Ac Operating Voltage In Volts:

90.0 single voltage and 240.0 single voltage

Special Features:

26 port; layer 2 entry level 10/100 lan switch; ieee 802.1x network access control; bandwidth limiting; 4 priority queues; dual-personality gigabit thernet interfaces; multicast filtering; 100 mb and 1000 mb fiber connections; fanless operation

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
