Overall Length:

8.500 inches

Overall Height:

1.750 inches

Overall Width:

16.500 inches

Electrical Power Source Relationship:

Operating

Unpackaged Unit Weight:

2.000 pounds

Product Name:

Rds plus (router delay simulator), int/ext clock to 52mbps

Special Features:

Timing modes: transparent (passthrough timing from one port to another with selctable routing); interna (stratum 4) clock synthesizer, internal w/ frequency-lock to extenal timing port; data rate: from 1200 bps to 51.84 mbps; delay range: 10 milliseconds(ms) to over 4000 ms, in 1 ms increments, or from 100 bits to over 65000 bits in 1 bit increments; power source: 85-264 vac; operating temp: 32 to 122 degree fahrenheit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T263-c
