

View Online at <https://aerobasegroup.com/nsn/5895-01-590-8670>

Special Features:

High performance torque mode control, loop update every 100 microseconds, digital design , sinusoidal commutation , integral shunt regulators add protection , continuous output current: 8.2 amps rms/phase, peak output current: 14 amps rms/phase , input voltage: 115/230 vac rms , rated output power: 2,000 watts , output switching freq: 20khz, input current at rated output: 20amps rms, continuous regen power: 600 watts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
