**Basic Shape Style:**

Rectangular or square

**Inclosure Type:**

Encased

**Circuit Construction Type:**

Solid state

**Operating Ac Frequency In Hertz:**

47.0 single voltage and 63.0 single voltage

**External Ac Operating Voltage In Volts:**

20.0 single voltage and 125.0 single voltage

**Special Features:**

16 outputs per module; 2 commons (isolated) per module; ssr array (triac)output type; 140 vac peak voltage; 1.1a/point current; 50ma load; 8ms off to on/on to off response; removable terminal

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A32200
