Overall Height:

Between 6.970 inches and 7.440 inches

Overall Width:

16.750 inches

Usage Design:

Mainframe

Special Features:

9 slots, 2 are located internally and are dedicated to housing the 2 slot hp e1326b multimeter, built-in high performance command module with built-in hp-ib interface, supports: 256kb, 720kb and 1.4kb, drive provides storage for programs and data as well as for autostart routines, internal ram volume, optional internal floppy drive and external ss/80 drives are all supported, data transfer bus: 16 bits, connections: p1, dc output voltage: +5v current 12.2a, +12.2v current 4.6a, -12v current 0.9a, input voltage: 115vac to 230vac (250v max) input frequency: 50hz to 400hz, optional dc operation: voltage 11-30vdc, current 20a maximum, rack mountable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A511I0
