**End Application:**

An/tsq-198b

**Unpackaged Unit Width:**

91.0 inches

**Unpackaged Unit Height:**

100.0 inches

**Unpackaged Unit Weight:**

15543.0 pounds

**Special Features:**

Height: 100 inches; depth: 325 inches

**Functional Description:**

The tacs is a mobile communication system. It provides air traffic services at remote landing, drop, and pickup zones. Tacs equipped units will provide air traffic services for aviation assets conducting reconnaissance, maneuver, medical evacuation, logistics, and intelligence operations. The tacs consists of a m1165a1/b3 high mobility multipurpose wheeled vehicle, cargo/troop carrier (hmmwv), a group of radios in a rack, and m1101 high mobility trailer.

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fiiq:**

A23800
