Special Features:

The sdn-l-p2 ku-band kit is a subsystem to sdn-lv3b nsn: 5895-01-629-1183; 1 case, a 96 cm reflector (8 individual petals), capable of 4 db increase isotopically radiated power (eirp), over the stock 60cm panther aperture. This p2 ku-band kit allows soldiers to operate from fringe areas of spot beam and leverage larger upstream bit rate networks without significantly increasing footprint. Help desk 1-866-333-7286 or sdn pds suport@navy.Mil.
